Designer/ Visual/UI/ Interactive

Personal

Digital designer with a strong background in user interface design for video games, combining creative vision with technical expertise to deliver engaging and functional interactive experiences.

Proficient in translating gameplay mechanics, narrative elements, and user needs into intuitive UI systems that enhance player immersion and overall usability. Experienced in designing for a wide range of gaming platforms, from mobile to console and PC.

Skilled in leveraging industry-standard design tools and methodologies to create visually cohesive and strategically aligned interfaces. I stay up to date with the latest trends in game UI/UX, user behavior, and technological advancements.

Extensive experience in user-centered design, ensuring that each interface supports player flow. My approach balances aesthetics, accessibility, and functionality to create seamless user experiences.

I collaborate effectively with multidisciplinary teams, including developers, game designers, and artists, to bring complex projects from concept to final implementation.
